Palm down gestures are generally seen as dominant, emphasizing and possibly aggressive especially when there is no movement or bending between the wrist and forearm. This Palm up, Palm down is very important when it comes to handshaking and where appropriate.

Mouth movements can give away all sorts of clues. We purse our lips and sometimes twist them to the side when we're thinking. Another occasion on which we might use this movement is to hold back an angry comment we don't wish to reveal. Nevertheless, it will probably be spotted by other people and although they may not know the comment, they will get a feeling you were not pleased.
